SUMMARY

I am an entry-level UI/UX Designer and Front-End Developer from Bogor, Indonesia, passionate about merging design and technology. With over 2 years of experience in the IT industry, I have worked on mobile apps, web platforms, and responsive web design, focusing on solving complex challenges through design thinking and iterative processes.

From wireframes to high-fidelity mockups, I create user-centric solutions that foster creativity and deliver seamless user experiences. My approach ensures that the products I develop are not only visually appealing but also functional.

Diligent, honest, and adaptable, I excel at working independently or in teams. I am proficient in HTML, CSS, JavaScript, React, Vue, Figma, and Adobe Photoshop, and I continuously stay updated on the latest design trends to refine my skills.

PT. Sagara Xinix Solusitama
UI/UX Designer | *Fulltime* *Oktober 2022 – saat ini*

Responsibilities:

- As a UI/UX Designer and Front-End Developer, designing UI/UX that meets the specific needs and preferences of clients with a user-focused approach to create intuitive and appealing interfaces.
- Conducting in-depth research to understand client design needs, ensuring that the resulting design solutions are relevant and effective for the target audience.
- Transforming designs into code with precision, ensuring the final product aligns with the original design vision and functions well across various devices, including desktops and mobile.
- Proactively learning and mastering foundational programming skills in frameworks such as Laravel, React, and Vue to enhance front-end development capabilities and support more complex projects.
- Delivering high-quality design services to numerous clients, building a positive reputation through high client satisfaction and long-term engagement, and successfully completing over 10 design and slicing projects with positive feedback.

Achievements:

- Successfully completed over 10 design and slicing projects for clients across various industries, delivering work that meets client business needs and receiving positive feedback for functional and aesthetic designs.
- Recognized for the ability to implement designs into code with high accuracy, accelerating project completion times while maintaining visual and technical quality.
- Mastered the basics of Laravel, React, and Vue in a short time, enabling greater contributions to full-stack projects and expanding skills in web application development.
- Maintained high service standards while building long-term relationships with clients through consistent and satisfying design outcomes.

PT. Bangunindo Teknusa Jaya
Front-End Developer | *Internship* *Desember 2021 – Maret 2022*

Responsibilities:

- Serve as a frontend developer focused on building and enhancing company websites.
- Develop company websites utilizing the CodeIgniter 4 framework, ensuring robust functionality and scalability.
- Implement responsive design by translating detailed design files into efficient code, contributing to an engaging user experience.
- Maintain regular updates through progress meetings held every Tuesday, where key developments, challenges, and upcoming tasks are discussed to ensure alignment with project goals.

Achievements:

Phone/WA: +62(0)8567635867

https://linkedin.com/in/hanif-royyan
hnfroy@gmail.com

- Successfully optimized website performance, achieving a load time improvement of over 30% by implementing efficient code practices and optimizing resources within CodeIgniter 4.
- Completed the slicing process for a company profile website within two weeks and ensuring pixel-perfect design implementation.
- Successfully delivering projects ahead of schedule while maintaining high standards in code quality and design accuracy.

CV.IDS
Web Developer | *Internship* *Maret 2021 – Juni 2021*

- Creating a games form on the kejar.id educational webapp.
- Design to code using bootstrap.
